

High Gradient Research at KEK / Nextef

Monday, 19 April 2021 13:00 (30 minutes)

In KEK, we have been performing X-band (11.4 GHz) high-gradient research with normal-conducting structures.

In this presentation, we review past achievements, and report the recent status of our high gradient test stand: Nextef.

Moreover, we delineate an outlook for future studies from various aspects.

Presenter: ABE, Tetsuo

Session Classification: Session 1
