

CERF-NM: The C-band Engineering Research Facility in New Mexico

Monday, 19 April 2021 09:45 (30 minutes)

The C-band Engineering Research Facility in New Mexico (CERF-NM) consists of the US's highest-power C-band RF source to date; a shielded enclosure rated for 5 MeV and 10 uA; and flexible control and data acquisition system. This talk presents an overview of the C-band research program at Los Alamos, details of the CERF-NM facility, and future plans for the program.

Summary

Presenter: LEWELLEN, John (Los Alamos National Laboratory)

Session Classification: Session 1
