

# International Workshop on Breakdown Science and High Gradient Technology (HG2021)

Contribution ID: 83

Type: **not specified**

## High dose rate linacs for FlashRT

*Tuesday, 20 April 2021 14:15 (15 minutes)*

TibaRay is developing the PHASER radiation therapy system for delivery of FLASH treatment of cancer. The hardware is based on several key developments centered around the concept of distributed coupling linacs that are highly efficient, compact and well-suited for productization.

### Summary

**Presenter:** GANGULY, Arun

**Session Classification:** Session 5
