## Frontier Summaries and Panel Discussion: Science Highlights

*Monday, 25 July 2022 08:00 (1 minute)*

In this discussion, each of the Frontiers gives a summary of the physics highlights / Big ideas, which defines their vision for 2025-2035 and 10 years after 2035. These physics highlights will be followed by a summary on experiments proposed to investigate them and their proposed timelines (timelines=R&D, construction and data collection). Each Frontier will also comment on the mapping of their science on the current P5 science drivers. The collective physics highlights from all Frontiers may reaffirm the P5 science drivers or a need to extend them.

### **In-person or Virtual?**

**Session Classification:** Physics Highlights from the Frontiers
