Frontier Summaries and Panel Discussion: Enabling HEP Research

Frontiers: AF, CEF, COMPF, IF, TF, UF

Title: Enabling the Physics Goals

Abstract: Each Frontier describes briefly a) their goals and priorities; b) critical R&D or infrastructure needed during 2025-2035 to support and enable the physics vision discussed during panel on physics highlights and how they may benefit from targeted funding; and c) R&D or infrastructure needs to support the proposed physics measurements in 2035+ and may be developed by next P5. Each Frontier will comment on the related P5 science drivers and also if any of their goals do not map on the P5 science drivers.

Session Classification: Physics Highlights from the Frontiers
