ICARUS Data Quality Monitoring

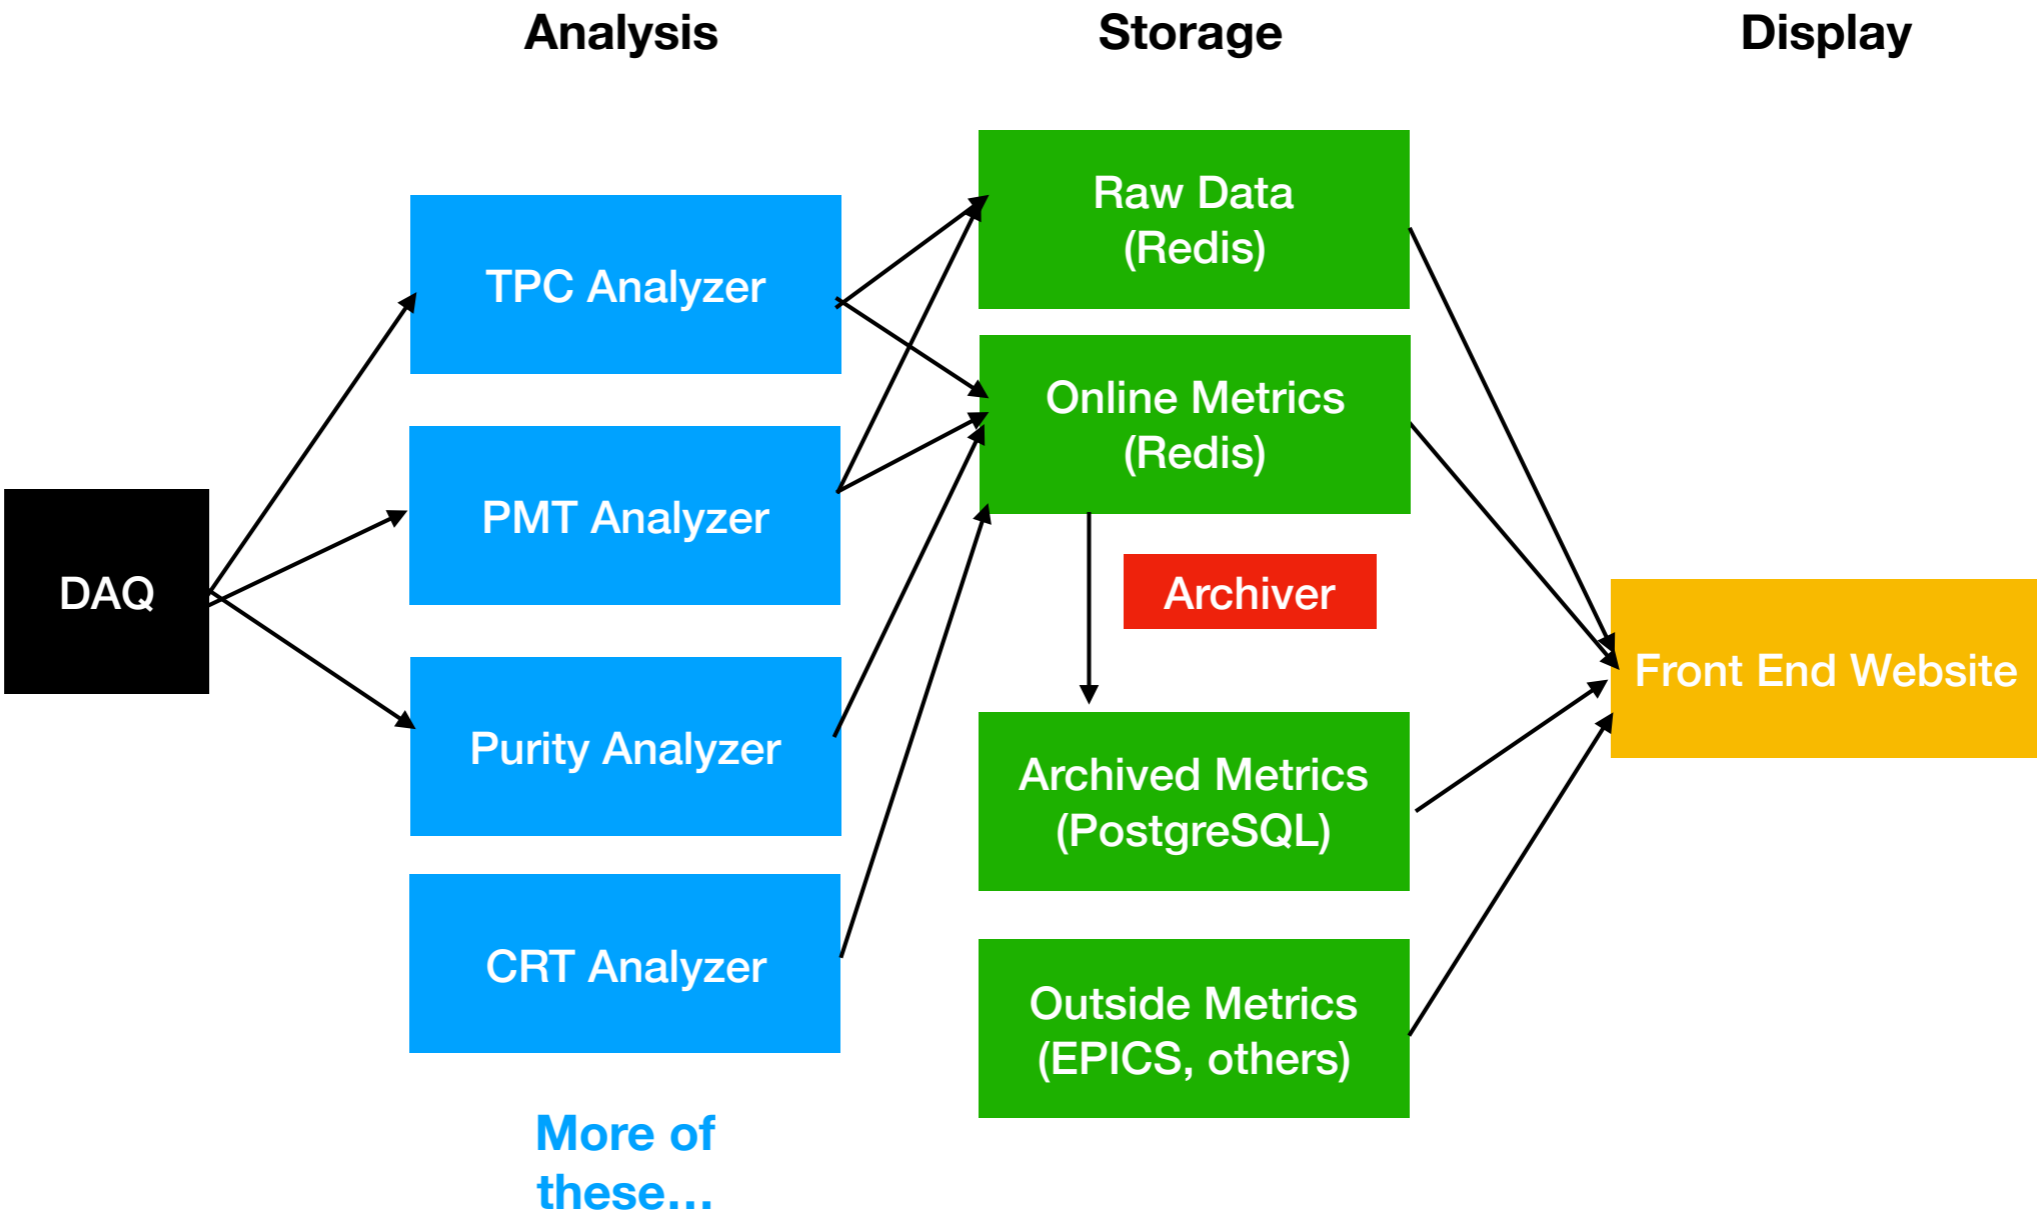

Minerba Betancourt

January 16 2020

Online Monitoring Infrastructure

- Using the same framework from SBND, developed by Gray Putnam at the SBND vertical slice test summer 2018

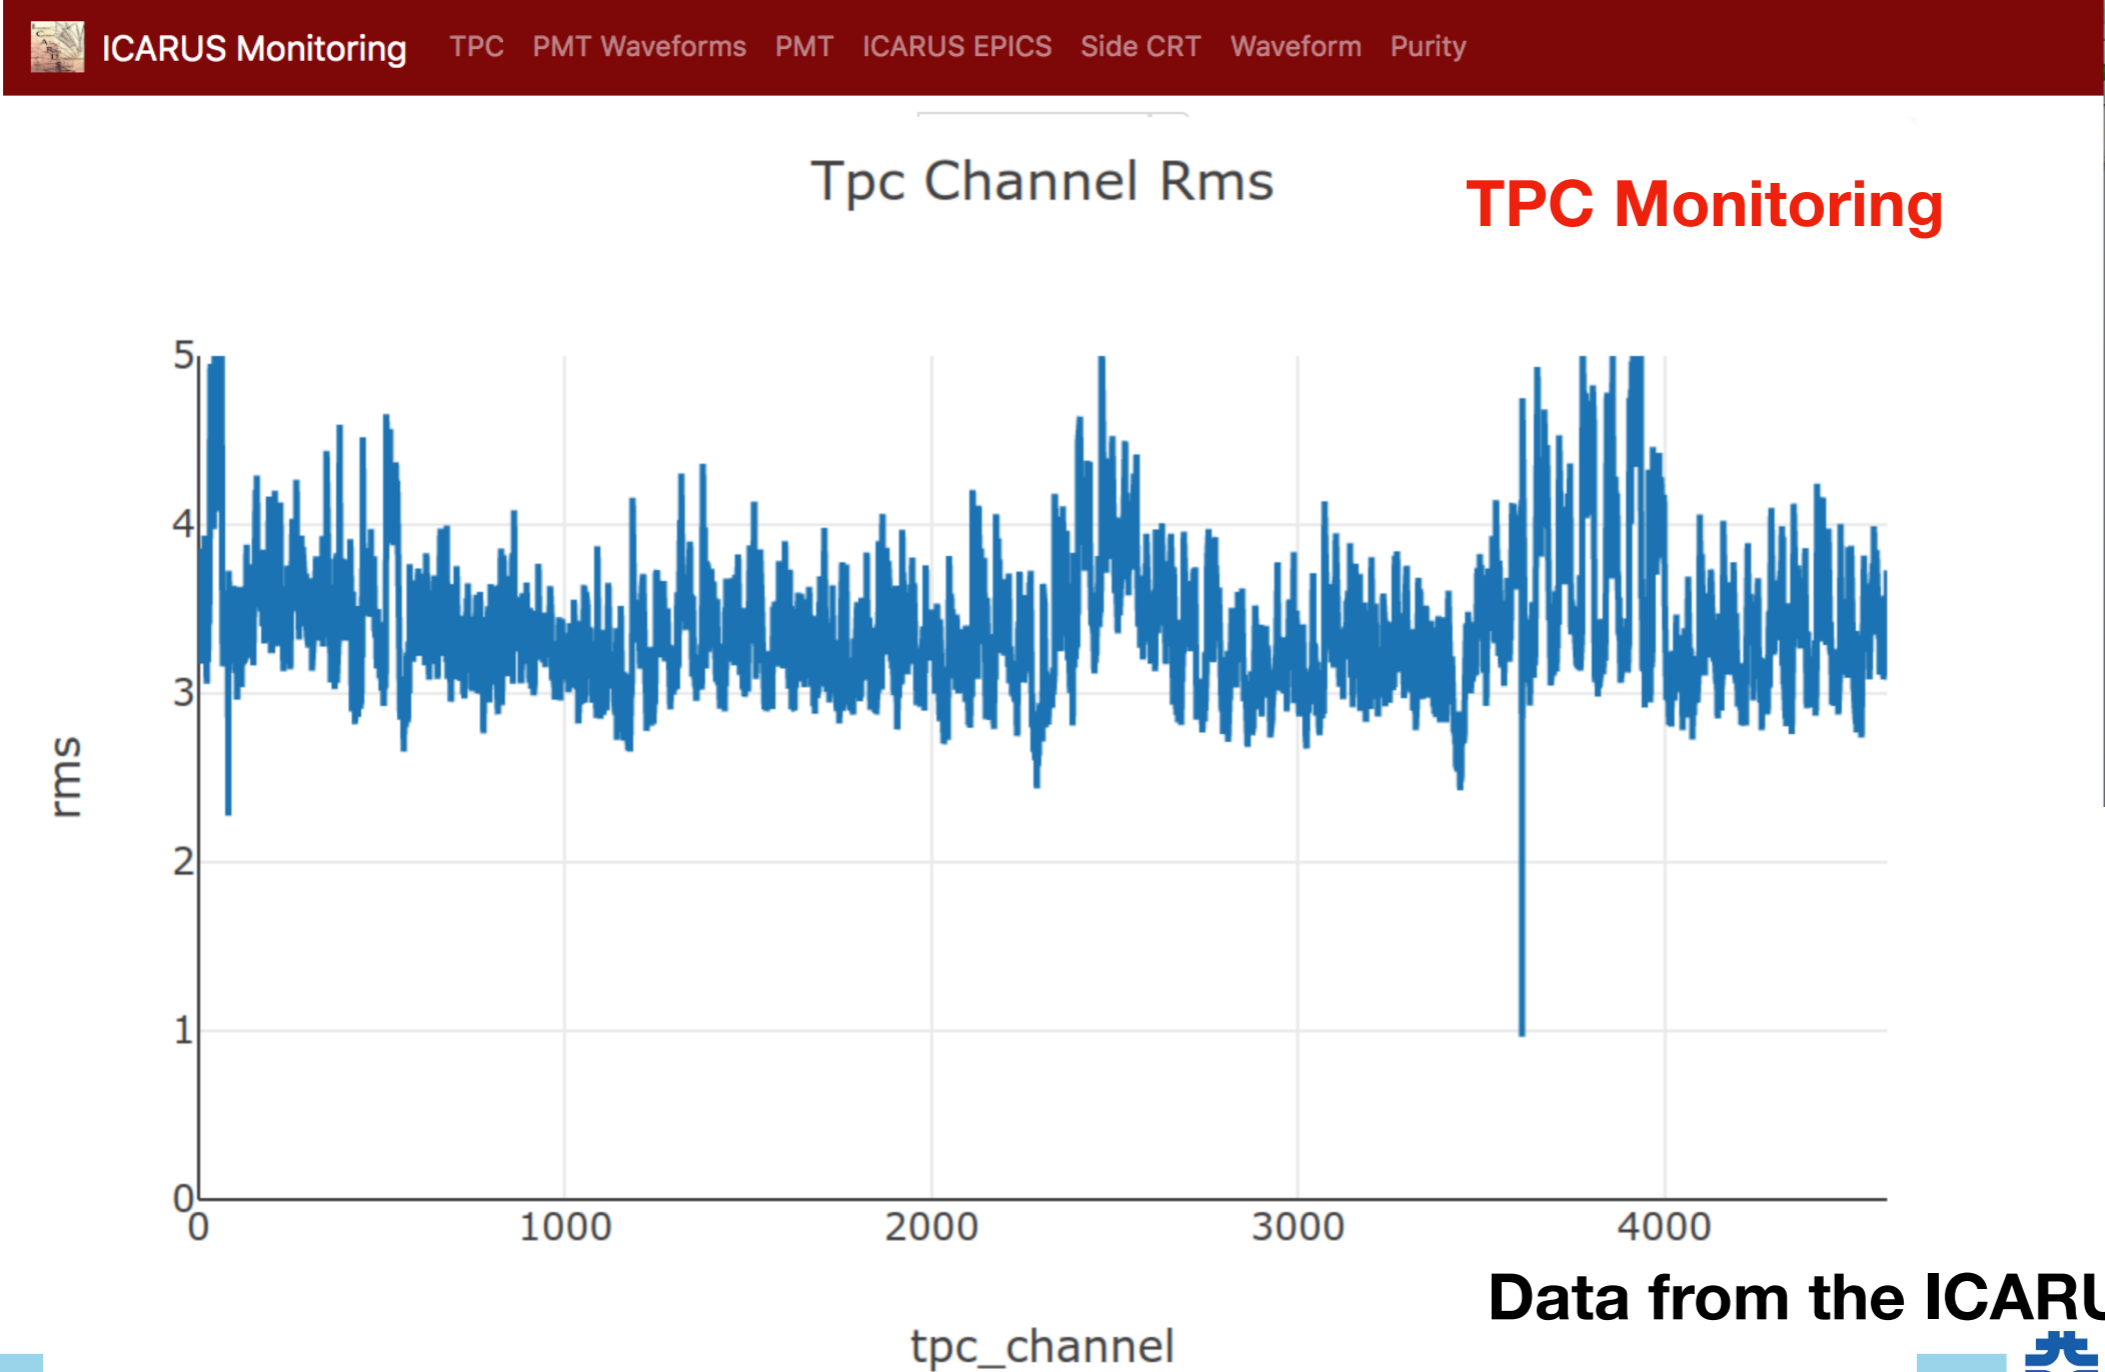

Online Monitoring Flow Chart

Status of the Online Monitoring in ICARUS

- We created separated SBN-online website and database for SBND and ICARUS
- We replicated the setup from SBND to ICARUS

ICARUS Online Monitoring

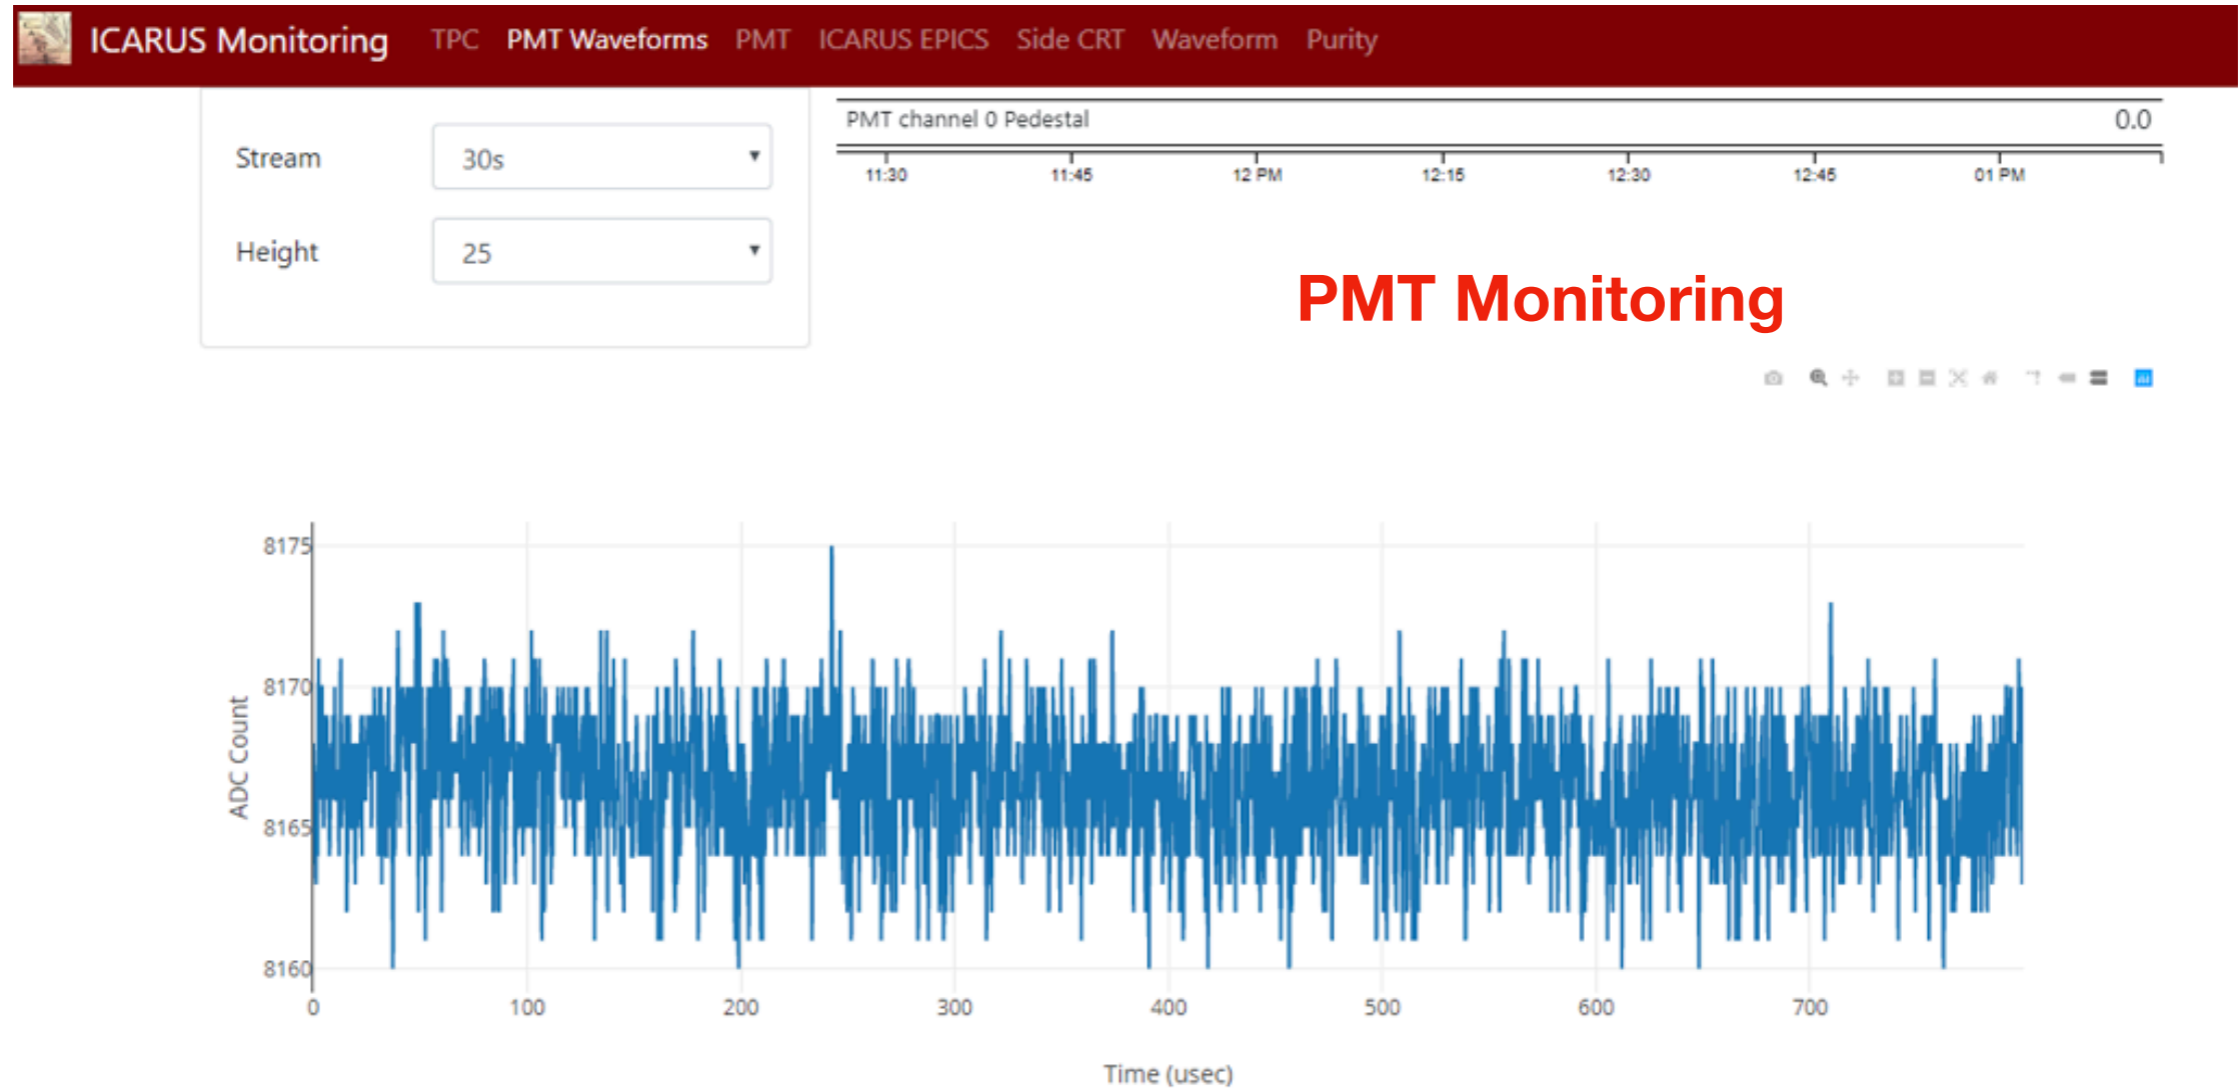

Data from the ICARUS VST

PMT Monitoring

- PMT Waveforms

- We are developing metrics to monitor the PMTs, for example
 - Making a heat map with ADC count

CRT Monitoring

- Monitoring data from the north wall side CRT
- We are reading 8 Front end Boards

CRT Board 0 Data

Display Options

Data

- ✓ MaxADCValue
- n_events
- baseline

Stream

- TS0
- TS1

CRT Monitoring

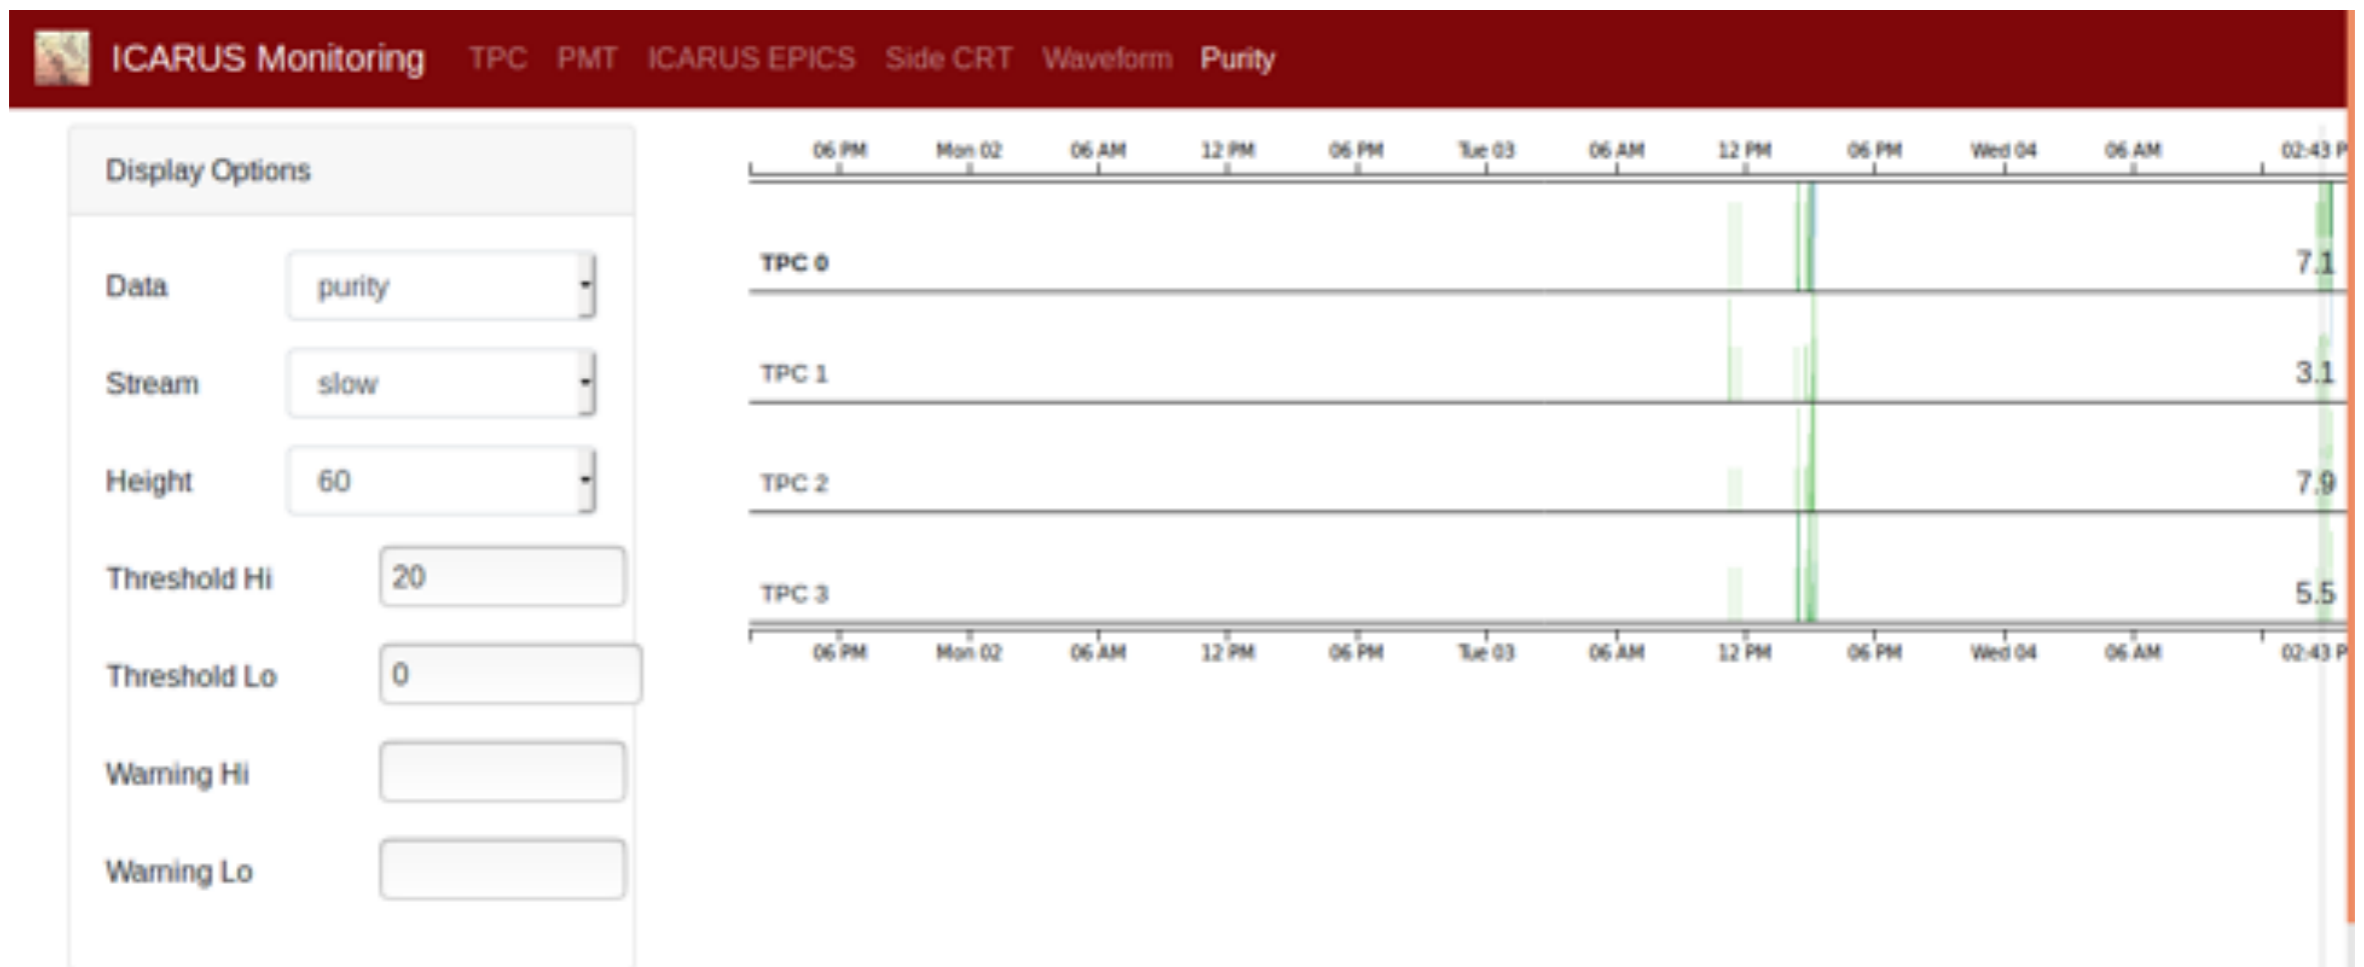

Event Display Development

- TPC event displays
- Prototype event display accessing zero-suppressed waveforms from a database
- Using ICARUS MC simulation

Purity Measurement in the Online Monitoring

- Using a fast method to perform the purity measurement developed by Christian Farnese
- The purity measurement is displayed per each TPC

- We are validating the code with different MC samples and developing tools to display of purity versus time

Latest Tests

- Yesterday we ran both with PMT and TPC systems at the same time
- Displaying data quality metrics from TPC and PMT at the same time! **TPC Monitoring**

1001 01/15/2020 15:31:34 **General** **PMT** **TPC**

Bruce Howard
Entry Subject: *Screenshots related to running both PMT and TPC*

PMT Monitoring

Recent Database Work

- We have been building out the database infrastructure
- Justin Mueller and Bill Badgett have developed the online monitoring Archiver program, which will aggregate metrics from online database to the archived database
- This will be tested soon at ICARUS
- Bishu has been creating the database tables we need for all the systems (TPC, PMT and CRT)

Ongoing Activities

- Testing the online monitoring with the different systems TPC, PMT and CRT
- Validating the purity calculation in the online monitoring
- Developing metrics for the different systems: TPC, PMT and CRT
 - Please let us know any monitoring metric you would like to see during shifts
- There is room for more development, please contact me if you are interested in joining the data quality effort!
