Rename LArG4 to LegacyLArG4

Lynn Garren

LArSoft Coordination Meeting

Feb. 25, 2020

Changes in larsim PR 6 and larsoft PR 8

- We want to send a clear message that everyone should use larg4, not the old larsim/LArG4
- larsim/LarG4 renamed to larsim/LegacyLArG4
- migration scripts in larsoft
 - UpdateToLegacyLarG4.sh
- nearly all the required changes are in larsim
- Note that fcl files using LArG4 inherit from largeantmodules.fcl
- dunetpc needs to run the migration script
 - or alternatively use the provided feature branch
- This is the simplest change to make, and affects very little.

Questions

- Should we also rename the LArG4 module to LegacyLArG4?
 - change largeantmodules.fcl
 - change LArG4_module.cc
- What about these:
 - LArG4Parameters.h
 - LArG4Parameters_service.cc
 - LArG4Ana_module.cc
