

# Workshop on the LEM/Thick GEM cryogenic utilization in pure Argon over large detection surfaces

## Monday, 6 April 2020

### R&D on LEM/Thick GEM, discussion on protoDUNE-DP phase II (14:00 - 18:20)

-Conveners: Filippo Resnati

| time  | [id] title  | presenter              |
|-------|---|------------------------|
| 14:00 | [6] THGEM Experience at Weizmann                                  | BRESSLER, Shikma       |
| 14:30 | [7] THGEM Experience with COMPASS                                 | Dr DALLA TORRE, Silvia |
| 15:00 | [8] Glass Thick GEM   | FUJIWARA, Takeshi      |
| 15:30 | [9] Micro-RWELL   | BENCIVENNI, Giovanni   |
| 16:00 | Break   |                        |
| 16:15 | [10] Charge and light signal amplification in two-phase detectors | BUZULUTSKOV, Alexey    |
| 16:45 | [19] Multilayer THGEM   | Dr CORTESI, Marco      |
| 17:15 | [18] R&D on LEM improvements for phase II of ProtoDUNE-DP         | Dr DELBART, Alain      |
| 17:45 | [11] Discussion on LEM design for phase II of protoDUNE-DP        | Dr DELBART, Alain      |
