

Harry Weerts

Interim Associate Laboratory Director, PSE

“PSE Directorate Strategic Plan”

Thursday, March 5, 2015 – 3:30 p.m.
Bldg. 200, Auditorium

As Interim ALD, I believe that our large and complex directorate will be more effective if we can learn from each other about the great science and mission support work that happens every day here in PSE.

As part of my plan to encourage more collaboration and information-sharing, I am pleased to announce the new monthly PSE Open Mic Seminars. It is my hope that the PSE Open Mic will have a different structure and feel from the traditional seminars and colloquia that are frequently held in the scientific divisions. Unlike those, which are often held by invited speakers from outside Argonne, the PSE Open Mic will be Argonne-centric to foster more interaction and engagement within the laboratory. Therefore, I encourage all of you to come out and learn more about our innovative science and our essential mission support activities.

In this first Open Mic, I will talk about the directorate’s strategic plan. I will discuss what we are doing and what we plan to do, and will welcome your feedback on our future.

Light refreshments will be served 15 minutes before talk.
