

Jeff Chamberlain

Director, Argonne Collaborative Center for Energy Storage Science

“Battery Horizons: Science and Technology Spanning Lithium Ion and Beyond”

Thursday, October 1, 2015 – 3:30 p.m.
Bldg. 401, Conf. Rm. E1100/E1200

Society has become increasingly dependent on energy storage to function in our daily professional and personal lives. Jeff will present an overview of what is driving our dependence on energy storage, where the scientific challenges are most acute, and what the commercial market is telling us about where our research might have its greatest impact.

Light refreshments will be served 15 minutes before talk.
