

Milky Way Survey Report

- Hooray for everyone being in the same room
- Running desisim at NERSC
 - ready to add MW-specific options, will do near-term
 - continue communicating with David Kirkby about the moon model
- Draft MW targets now with FA group
 - there is a plan for the first test assigning MW fibers with the BGS
- Knowledge of FA plan -> another iteration of MW target selection in progress
 - New version of mock catalogs, too
- Input given to QuickCat group
- Lots of other useful info learned about the DESI software ecosystem
 - MWS is being added to structure made as DESI was designed
 - Thanks for all the help
