

# XVI International Symposium on Very High Energy Cosmic Ray Interactions (ISVHECRI 2010)

## Wednesday, 30 June 2010

### Extensive air shower experiments: 1 - One West (10:05 - 10:35)

-Conveners: Gaurang Yodh

time	[id] title	presenter
10:05	[5] Cosmic ray data and their interpretation: the Tibet hybrid EAS experiment -- Primary energy spectra of Cosmic Rays at the knee and tests of hadronic interaction models --	Prof. MA, Yuqian

### Extensive air shower experiments: 2 - One West (11:05 - 12:35)

-Conveners: Gaurang Yodh

time	[id] title	presenter
11:05	[128] The present status of the GRAPES-3 experiment	Prof. GUPTA, Sunil
11:35	[22] Results from the GAMMA experiment on Mt. Aragats - improved data	Dr MARTIROSOV, Romen
12:05	[131] Cosmic Ray Physics with IceTop and IceCube	Dr TILAV, Serap

# Thursday, 1 July 2010

## Extensive air shower experiments: 3 - One West (08:30 - 09:30)

-Conveners: Suresh Tonwar

time	[id] title	presenter
08:30	[32] The KASCADE-Grande experiment: recent results about the energy spectrum	Dr ARTEAGA-VELÁZQUEZ, Juan Carlos
09:00	[40] Study of the longitudinal development of extensive air showers with the Muon Tracking Detector in KASCADE-Grande.	Dr DOLL, Paul
09:15	[11] Behaviour of the EAS age parameter in the knee energy region	Prof. CAPDEVIELLE, Jean-Noël
