

# MOTIVATION

---

- *Good Documentation is Efficient*

It guides the user to spent less time on *secondary tasks* and more time on *primary tasks*.

- *Good Documentation is a Quality Indicator*

*Weak products* often provide documentation that is even weaker. *Great products* almost always provide excellent documentation.

- *Good Documentation grows the User Community*

Low quality documentation drives users to look for alternatives. High quality documentation encourages the user to spent more time with it.

- *The Open Science Grid is a Product*

Good Documentation helps to sell it.
