

Status: BlueArc Purchase, MOU's

Lee Lueking

March 17, 2010

NuComp Meeting

Central Storage Purchase (Ray Pasetes)

- The status of the purchase req as follows:
 - CD112561 - Storage for IF (~99TB usable)
 - CD112562 - Rack for storage
 - CD112563 - PDUs for rack
 - CD112564 - Capacity License to add storage to BA
- Have all been placed. As of this morning, 3/16/2010, the Quadrant head has approved all reqs and they are waiting for the "Checkout" approver to move them over to the BSS system.

MOU's (Lee)

- Plan to have new or revised MOU's for NO_vA, MINER_vA, and MINOS in coming weeks.
- NO_vA MOU is close to begin working on broader Experiment and CD approval. Possibly some CD content/format issues.
- Plan to review and amend MINER_vA next month and go through the review process.
- Will work on MINOS, and other experiments after that.
- Iterating on content and format details, hope to streamline the process. Plan to have ~yearly review and amendments.
