## Implications of CoGeNT's New Results For Dark Matter

*Wednesday, 31 August 2011 15:10 (20 minutes)*

This talk will present on an independent analysis of the recent release of the first 15 months of CoGeNT's data. The analysis will focus on the properties of a dark matter particle that are consistent with the spectrum and modulation of the low energy excess of events in the detector. I will also examine the prospects of detecting such a dark matter particle at other experiments.

**Presenter:** KELSO, Chris (University of Illinois at Chicago)

**Session Classification:** Parallel Session 7
