## Recent CP violation results from BABAR

*Monday, 29 August 2011 12:35 (20 minutes)*

We report recent results of CP violation studies in B, charm and tau decays from BABAR. These include determinations of the unitarity triangle angle  $\gamma$  in  $B \rightarrow D^0 K$  ( $D^0 \rightarrow K\pi\pi^0$ ), CPV measurements in  $D^{+-} \rightarrow K_s^0 h^+ h^-$  and  $K_s^0 \pi$  and in the tau decay  $\tau \rightarrow K_s^0 \pi \nu$ .
