

Short-Baseline Neutrino Workshop (SBNW11)

Thursday, 12 May 2011 - Saturday, 14 May 2011

Fermilab

Scientific Program

The Workshop will cover recent short-baseline neutrino results, theoretical interpretations, future neutrino facilities, and future short baseline neutrino experiments. The goal of the Workshop will be to discuss future facilities and experiments that can be built at Fermilab and elsewhere to explore short-baseline neutrino physics (including neutrino oscillations, CP violation, sterile neutrinos, axion searches, cross sections, etc.).

For detailed program check the Timetable link or download it here.

Experimental Short-Baseline Neutrino Data

Theoretical Interpretation of Short-Baseline Neutrino Data

Future Neutrino Facilities

Future Short-Baseline Experiments
