

NF04: Neutrinos from natural sources

Yusuke Koshio, Gabriel Orebi Gann, Erin O'Sullivan, Irene Tamborra

Meeting goals:

- Forum to bounce ideas on future perspectives.
- Gather community input.
- Strengthen interactions across Neutrino Frontier subgroups.

Ideas for meetings:

- Satellite meeting in connection to e.g. APS April Meeting 2021.
- Dedicated meeting on neutrinos from natural sources (possible location: LBNL).
- Online meeting on neutrinos from natural sources.

Questions:

- Should dedicated meetings occur before or after the Frontier workshop?
- What are the goals of the Frontier workshop vs. topical group workshops? Which is their relative timing?
- Should we decide on the need for a dedicated workshop after the Aug. deadline for LOIs to gauge the community response?
