

- Running very well throughout the COVID-19 stay-at-home period
 - Both Tier 1 and LPC have continued to be stable in the last month **thanks to lots of hard work from FNAL Computing both on and off site**
- Working our way through our annual internal operations program review, gathering up budget for CY21.
 - CMS significantly reduced its resource requests for 2022, meaning we will need to buy less in 2021.
 - Tape will certainly be a focus for us in the next year — both migration (ongoing fire) and the new library purchase (making good progress).
 - We are on track to decommission our SL6 interactive nodes by our self imposed September 1 deadline!
