

Artificial Neutrino Sources Group LOI Plans

L. Fields, A. Marino, P. Ochoa, J. Spitz

- No LOIs have been submitted directly to our group yet
 - But at least two (NF0-001 and NF1-002, both CEvNs-related) have some relevance to our group
- Discussions ongoing with many people/groups to solicit LOIs:
 - NA61 and EMPHATIC
 - T2K, HK, LBNF/DUNE
 - JUNO-TAO and PROSPECT
 - IsoDAR
 - Small groups: nuclear people interested in reactor measurements, tau neutrino appearance w/ accelerators
- We expect that many white papers relevant to our group will have overlap with other topical groups

Artificial Neutrino Sources Group Workshop Plans

L. Fields, A. Marino, P. Ochoa, J. Spitz

- Tentatively planning a Virtual Workshop Oct 5-7
 - Planning ~3 hour zoom meetings each morning
 - Have begun brainstorming agenda items
 - Lots of talks we know we want
 - Also leaving room for volunteers / authors of LOIs not currently on our radar
 - Also considering some sessions joint w/ other topical groups
