

CompF4: Summary

Wahid Bhimji (NERSC), Rob
Gardner (U Chicago) Frank
Wuerthwein (UCSD)

August 11th 2020

Process

- The [web site](#) for CompF4 has scope and mandate of the group.
- We created a [google doc](#) for participants to write down any comments and suggestions.
 - This also has our running notes of the meeting.
- Parallel split into 7 parts:
 - Discussion of Scope & Mandate of the group
 - 6 talks with lots of lively discussion
- Attendance between 30-50 people
 - Discussions went well into break both times ...

The Talks

- Edge Services ... Joe Breen (U.Utah)
- Storage Evolution ... Shikegi Misawa (BNL)
- Analysis Facilities ... Brian Bockelman
(Morgridge/UW-Madison)
- Upcoming Computing Facilities ... Nick Wright
(NERSC)
- AI Hardware and Facilities ... Wahid Bhimji
(NERSC)
- Future Landscape of Science Networking ... Eli
Dart (ESnet)

It's impossible to summarize
what happened in the parallel

That's why its recorded and there is the google doc ...

What's next?

- We are considering a second workshop dedicated to CompF4 this “fall”.
 - maybe with invites for specific topics to other working groups.
 - If conveners from other groups are interested, please get in touch!
- We encourage people to send us LOI's if you want to influence both the existence and agenda of such a possible 2nd workshop.
