

Panel Discussion

Tuesday, 11 August 2020 14:00 (1 hour)

we are planning a panel discussion with the topical groups of the Computational Frontier and the audience about the next steps in the Snowmass process for software and computing.

We want to ask the panelists and the audience questions about what they learned in the sessions so far about topics that span several topical groups or even frontiers. We want to discuss which topics need follow up, for example in the form of smaller workshops or dedicated discussion meetings.

We hope this helps us to plan the further steps on the way to our Snowmass report.
