

# NF05 - Neutrino Properties

*Ben Jones, Carlo Giunti, Diana Parno, Lisa Kaufman*

- **Dates of CSS:** Better keep the original dates
  - ◆ Avoid conflicts with commitments that people have already taken
  - ◆ With delay process becomes too long: people lose focus and get tired
- **Neutrino Frontier Report:** OK for us
  - ◆ No need of separate Topical Group reports
  - ◆ Better in order to avoid repetitions and present a coherent picture
- **Level 3 headings of the Neutrino Frontier Report:**
  - ◆ OK for Neutrino Properties (Mass, Dirac/Majorana nature, EM properties)
  - ◆ Possible addition: Neutrino Lifetime (typical particle property in RPP)
- **Document workshops:**
  - ◆ Main goal: attract people to participate to white papers?
  - ◆ Discussion after each presentation should be encouraged and stimulated by the moderator and the conveners if needed
  - ◆ Avoid long workshops: max about 3 hours
  - ◆ Weekly workshops are probably OK
