Mixing and CPV in beauty and charm at LHCb

The latest results of beauty meson decays from LHCb are presented. This includes the latest time-integrated CP violation measurements with information on the ($K\pi$) puzzle and on the CKM angle γ , and time-dependent CP violation measurements. In addition recent determinations of CKM elements, and the legacy result on B_s mixing will be presented

Presenter: Dr HOLLITT, Sophie (Technische Universitaet Dortmund)

Session Classification: Flavor and Precision Physics Session 2

Track Classification: Flavor and Precision Physics
