FIFE Meeting
23 July 2020

*23 July 1995: Hale-Bopp
Comet discovery*

News and announcements

- **Inform your line management of any issues you're having in the WFH environment**
- Thanks again to everyone for a successful workshop
- dCache upgrade last week to v5.2
 - Issue with offsite xrootd among other things: new HW did not initially have a DNS entry
 - Issues with default dCache door list offsite in ifdh. New version with a fix included in **ifdhc v2_5_10. Everyone should update to this version.**

Today's Agenda

- Late addition: clean up the common CVMFS areas
 - Lots of people use ifdhc, jobsub_client, cigetcert, etc. out of the common CVMFS area. Many old versions still lying around
 - Should create a cleanup/retirement policy
 - Let's do this by the end of the FY (2 months)
- Storage layout in the age of tokens
