

Introduction: EF05/06 Letters of Interest on nonperturbative effects in high-precision QCD predictions

Tuesday, October 6, 2020 11:30 AM (10 minutes)

We introduce Letters of Interest submitted to the EF05 and EF06 topical groups and dedicated to the treatment of nonperturbative effects in high-precision QCD computations and parton showering programs.

Primary frontier topic

Presenters: HOECHE, Stefan (Fermilab); NADOLSKY, Pavel (Southern Methodist University)

Session Classification: 92. Non-perturbative QCD dynamics at colliders
