Discussion for the Future

From now to decades later

SEC-NF coordination 9/9/2020

Future Research to Engage for Neutrinos
Theories, programs and technologies to develop

- From now to 10-20 years later

- Theory development, links with other fields

- Programs to develop

- Important technologies for neutrino research programs: neutrino sources, detector, and computation technologies

Future Community Development
Make the community healthy, welcoming, and productive

- Thinking for the next 50 years, until most of us retire

- Education for next generation scientists

- Inclusivity and equality

- International cooperation

Neutrinos for the world
What neutrino community can give back to the society

- Thinking for the far future

- Applications of technologies from neutrino research programs

- Applications of neutrino detections
