

Shielding Assessment Review Panel

Memorandum

Date: August 24, 2020

To: Matt Quinn, Chair - Radiation Safety Subcommittee
From: Keith Gollwitzer, Chair - Shielding Assessment Review Panel
Re: Shielding Assessment Document for the MeV Test Area at the Fermilab Linac Endstation

Message:

The Shielding Assessment Review Panel has reviewed *Shielding Assessment Document for the MeV Test Area at the Fermilab Linac Endstation* and associated documentation. Our review concludes that the assessment is satisfactory (methodology, completeness and compliance with the Fermilab Radiological Control Manual) for operation of the beam line from the Linac to the MeV Test Area under the conditions defined in the shielding assessment.

We recommend the acceptance of *Shielding Assessment Document for the MeV Test Area at the Fermilab Linac Endstation* dated August 24, 2020 (Revision 8).
