## **TWE: OSG installation tuning (CE/GUMS, ...)**

*Wednesday, 10 August 2011 12:00 (1 hour)*

Talk-With-the-Experts: OSG installation tuning (CE/GUMS, ...)

This session closing the system administrators track is an open, loosely structured interactive session where OSG experts are available to

guide and support users (scientists and system administrators) by answering questions or providing one-on-one coaching.

Among the others it will cover questions about installation, optimization and troubleshooting of OSG resources (e.g. CE, GUMS, SEs, ...).

A similar session is closing the campus grid and users track. Attendees are encouraged to move between one and the other room to meet with the different experts.

To help our planning, submit your questions in advance by sending an email to [OSG2011@highenergy.phys.ttu.edu](mailto:OSG2011@highenergy.phys.ttu.edu)

In the afternoon some experts will continue to be available in a breakout session parallel to the CMS Tier 3 workshop.

**Session Classification:** Site administrators - 2
