

Intro

Lols

- 52 received with varying degrees of connection to EF08
- Wide variety of topics: EWKino, Seesaw, NMSSM, Composite Higgs, MSSM scan, Vector-like Quarks, RPV, Naturalness
- Today's topics are intentionally the ones we've addressed least in these meetings
 - We'll be asking other authors to present in topical sessions in the future

Sub-groups:

- Compressed second meeting
 - October 19 at 10:am EDT (9:00am CDT).
 - The developing agenda can be found here: <https://indico.fnal.gov/event/45914/>
- We encourage you to form other sub-groups on your own (just send messages in slack to probe for interested parties):
 - Composite/Extra-dimension Resonance Benchmark
 - Strong pMSSM
 - Electroweak pMSSM
 - Scans and limits of simplified models
 - RPV Benchmarks
 - Other models benchmarks (lepto-quarks, etc)
- If you need support let us know: sending group emails, etc...
