

# "Big Questions in... Neutrinos Physics"!

This series aims to "explore the underlying questions that motivate Snowmass studies, and give an idea of how an early-career scientist might hope to address them over the course of a career in research."

Today **Erica Caden (SNOLAB, Laurentian)** and **Hiro Tanaka (SLAC, Stanford)** will tell us about **Neutrino Physics**.

Afterwards, please "**raise your hand**" to ask questions

raise hand

Stay tuned for more topics in the coming months!  
Recordings will be posted after each event.
