

FIFE News

Ken Herner
 FIFE Meeting
 29 Oct 2020

29 Oct 1929:
 Black Tuesday

News and announcements

- SL6 Docker container on FermiGrid now retired
 - SL6 jobs still possible but only via [Singularity](#). Recommend that you no longer put --OS=SL6 in jobs. Leave OS option out and control with Singularity image choice (see link above)
- **SL6 End-of-life in one month (11/30)**
 - Experiments should expect to have all machines and services transitioned before that time unless they have requested a variance
- Starting to see some EL8 workers in the wild now (Clemson)
 - Singularity should work fine there

Today's talks

- Progress on HEPCloud and HPC infrastructure (Maria)
- Data transfer post-gridftp (all)
