

Welcome!

Let's talk about electron scattering

Welcome!

Let's talk about electron scattering

Are people OK with being recorded?

Welcome!

Let's talk about electron scattering*

**There will be a separate workshop for “low energy”
(e.g. PVES)*

Goals for today

- What programs are out there? Are there any experimental gaps or high interest measurements beyond the programs outlined?
- What is the theory needed to support this work?
- Brainstorm what are helpful outcomes from the Snowmass process to support this unique community
 - Do we want a white paper? What content?

Additional content are planned...

- Generator workshop
- “Gaps” workshop in neutrino oscillation programs, exotica program
- Theory white paper being organized

(Each of these connect also to this content; we welcome participation)

Final word: timeline uncertain

Snowmass leadership are discussing a “pause” or a slowdown of work.
