

RF2: white papers & TG report

White papers foreseen:

- ❖ (1) Roadmap for rare η and η' decay physics:
 - ✓ expect to cover all theory and experiment (JEF, REDTOP) Lols.
- ❖ (2) Roadmap for rare kaon decay measurements:
 - ✓ expect to cover all kaon theory and NA62/KLEVER Lols.
- ❖ (3) CKM 1st row unitarity tests and LFU tests:
 - ✓ a paper in preparation following a series of $V_{us}+V_{ud}$ workshops, coordinated by V. Cirigliano;
 - ✓ could serve as a basis for a white paper.
- ❖ Lols not covered by the above:
 - ✓ kaons and hyperons at LHCb;
 - ✓ Kaon experiments outside CERN;
 - ✓ hyperons at a J/ψ factory.

TG report (first draft in early 2021):

- ✓ Sections corresponding to the white papers above?
