FIFE Meeting

10 Dec 2020

*10 Dec Many years:
Big day for Nobel Prizes*

*Wilhelm Roentgen
Pierre and Marie Curie
Enrico Fermi
Martin Luther King*

...and many more

- **SL6 EOL on Nov 30**
 - Everything moved over; a few experiments now run the SL6 container after logging in to their gpvms
- [Virtual CHEP 2021](#) abstracts open Dec 1 (in-person moved to 2022@JLab)
- **Future of Work (from Fermilab Today)**
 - **Monday, 12/14/2020 and 1/11/2021 at noon (12:00 pm CT)**
 - Please come join a discussion about the future of work at Fermilab – what we've enjoyed (or not) about working remotely, what future workspaces would support our mission critical work, and what can the lab do to recruit and retain future world-class talent.
 - Contact kcarter@fnal.gov for a zoom link for the meeting.
- No meeting 12/24

2020 FIFE Holiday Parody Song Contest

Three entries available [here](#): Vote now during the meeting!

Today's Agenda

- Resilient dCache retention and cleanup policies
- AOB

Resilient policies

- The problem: jobs using the jobsub dropbox feature have automatic cleanup, but nothing stops users from manually placing tarballs in the resilient area and leaving them there
- DUNE has implemented automatic cleanup of resilient files not accessed for 45 days
- Should we adopt a similar policy for all experiments?
 - If so, suggestions?
