

# Update on Wire-Cell TPC simulation for FD

Haiwang Yu (BNL)  
for the Wire-Cell Team  
Mar 1, 2020

# raw::RawDigit and sim::SimChannel consistency

Extract *raw::RawDigit* and *sim::SimChannel* from artROOT file using WCT TPC simulation

- also serves as a basic validation

Check *raw::RawDigit* and *sim::SimChannel* consistency

- *sim::SimChannel* is essentially depo rasterization to link depo to waveform
  - used for truth tracing
- Initial configuration has an offset due to inconsistent *G4RefTime* setup
- Fixed this
- and instead of hard coded *G4RefTime*, will use variable from the services\_dune.fcl
  - detectorclocks\_dune.fcl
    - *dunefd\_detectorclocks.G4RefTime*

# raw::RawDigit and sim::SimChannel consistency

-250  $\mu$ s

0  $\mu$ s

# Copy configurations to dunetpc

- Wire-Cell configuration: <https://github.com/HaiwangYu/wire-cell-toolkit/tree/dune-vd/cfg/pgrapher/experiment/dune-vd>
- Needs to be copied to dunetpc/dune/DUNEWireCell in current workflow
- Made a local branch, some issues pushing to redmine remote

```
$git remote -v
origin  ssh://p-build-framework@cdcvs.fnal.gov/cvs/projects/dunetpc (fetch)
origin  ssh://p-build-framework@cdcvs.fnal.gov/cvs/projects/dunetpc (push)
/dune/app/users/yuhw/vd/dunetpc/dune/DUNEWireCell
$git push origin feature/yuhw_wct_vd:feature/yuhw_wct_vd

# Horizontal Drift validation - W

# Horizontal Drift validation - U

Working on porting V. Galymov's 3-view geometry

- Should be done in 1-2 weeks

Full chain exercise with gen + g4 steps from VD

- has been hacking to use HD gen and g4

Field response calculations

- 2-view for FD
- 3-view
