Model-Atmosphere Spectra of Spectrophotometric Standard Stars - Access via the Virtual Observatory Service TheoSSA

Monday, 16 April 2012 17:10 (50 minutes)

The German Astrophysical Virtual Observatory (GAVO) provides the registered Virtual Observatory (VO) service TheoSSA (Theoretical Stellar Spectra Access, <http://dc.g-vo.org/theossa>). It is dedicated to the easy access of VO users to theoretical stellar spectral energy distributions, calculated with any model-atmosphere code.

We show examples for TheoSSA in operation.

Primary author: Dr RAUCH, Thomas (Institute for Astronomy and Astrophysics, Kepler Center for Astro and Particle Physics, Eberhard Karls University, Tübingen, Germany)

Co-authors: Ms RINGAT, Ellen (Institute for Astronomy and Astrophysics, Kepler Center for Astro and Particle Physics, Eberhard Karls University, Tübingen, Germany); Ms REINDL, Nicole (Institute for Astronomy and Astrophysics, Kepler Center for Astro and Particle Physics, Eberhard Karls University, Tübingen, Germany)

Presenter: Dr RAUCH, Thomas (Institute for Astronomy and Astrophysics, Kepler Center for Astro and Particle Physics, Eberhard Karls University, Tübingen, Germany)

Session Classification: Posters
