

**Kevin O'Hara**

Director of Radiation Physics

Kevin is a Radiation Physicist with corporate responsibility for measurement and calculation of absorbed dose associated with the radiation treatment of product, such as sterilization of healthcare instruments. Kevin is an applied computational physicist with 30 years of experience in radiation physics, mathematical modelling and radiation dosimetry within a highly technical industry. Kevin is actively involved in industry committees, task forces and working groups. As a Working Group member, Kevin represents Canada on ISO TC 198 WG 2 (Radiation) and WG 5 (Terminology), WG 11 (Processes), WG 15 (Sterility Assurance).
