

Updating Interface Control Documents (ICD)

- We are working to update multiple tiers of interface documents
 - Integration to cryostat, cryogenics, conventional facilities
<https://edms.cern.ch/document/2391433/1>
 - Integration and Infrastructure to various FD1 detector elements (one high level document and separate appendices for each consortia) **Please review these**
<https://edms.cern.ch/project/CERN-0000214664>
- Developing FD1 interface drawings for the installation process
<https://edms.cern.ch/document/2452646/2> **Please review these**
- And the FD1 consortia should review and update their various ICDs between consortia
- FD2 documents will be developed as the design develops and matures

Model integration

- [FD1](#) models are stable (V8), but will begin to dive into the details for connections, support and access to elements on the roof of cryostat
- [FD1 Installation Cleanroom](#) – a new version based on V8 of FD1 model is posted
- [ProtoDUNE II](#) – version 6 in the works
- [FD2](#) – version 2 is being developed as the component/detector design matures
