B3 fx The large amount of talks are not ideal in this online setting, and the talks are often very detailed to appeal to a general audience. Can we change the format of the online users meeting, to focus on technical trainings or information sessions for users?

1	UM session/panel/tours/talks	feedback/comments
2	Virtual Poster session	low attendance: Users meeting virtual poster session was scheduled during 12:10-1:20 pm, but a very few people to none showed up for interacting with poster presenters. One presenter gave us feedback that not even judges showed up even though he was connected to the session for an extended time up until 2:00 pm. We need to improve the attendance and make sure at least a few people visits every poster in that session
3	Format of the meeting	The large amount of talks are not ideal in this online setting, and the talks are often very detailed to appeal to a general audience. Can we change the format of the online users meeting, to focus on technical trainings or information sessions for users? Can we combine different talks to reduce the amount of talks?
