

Turning Motivating Town Halls into CPs

- Need to document observations and suggestions from each Town Hall dedicated to demographic groups
 - How to take information from THs -> CP?
 - Need person power to manage 'study groups'
- Connections beyond physics (i.e. social sciences, education)
 - Panel discussions are much more rich with experts from fields relating to topics covered
 - Need folks who are aware of experts (or how to find them) in these fields to coordinate with TH organizers to enrich panels, as well as the WP to come from the discussions

Study Group Chairs

CEF3 has held a series of Town Halls aimed at listening and sharing the experiences of various underrepresented demographic groups

- Indico Category ([link](#)): Black, LGBTQIA+, Womxn, Ethnoracial D&I, Obstacles for AAIP folks, Early-Career, Accessibility
- In addition to related THs: Mental Health, Work/Life Balance, Mentoring, Societal Impacts of Science Projects, Code of Conduct

Wealth of Information from expert panelists, but how to distill all this information?

- Started with 'study group' from AAIP TH, but need to do all
- AND connect between groups: we share a lot and can learn from each other

Big Question: How exactly can a CP be made from this?

- Can be brainstormed by individual groups, need to find common message
