

RF1: Weak decays of b and c quarks

Angelo Di Canto (BNL), Stefan Meinel (U. of Arizona)

Rare and Precision Frontier Topical Convener Meeting

6 October 2021

Overview whitepapers

We have appointed editors of invited whitepapers that will give a concise overview of the physics discovery potential and questions that can be addressed in four main areas.

Topic	Editor 1 (Experiment)	Editor 2 (Theory)
High precision in CKM unitarity tests in b and c decays	Stephane Monteil (Clermont-Ferrand U.)	Alexander Lenz (Siegen U.)
Searches for other sources of CP violation in b and c decays	Diego Tonelli (INFN Trieste)	Yuval Grossman (Cornell U.)
Lepton-flavor and lepton-flavor-universality violation in b and c decays	(invitation sent)	(invitation sent)
Rare decays of b and c hadrons	Flavio Archilli (Heidelberg U.)	Wolfgang Altmannshofer (UC Santa Cruz)
