ABSTRACT

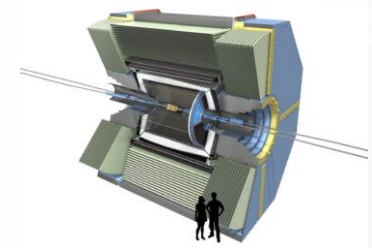

We have developed a metadata service for the Belle experiment which provides a mechanism to locate files using descriptive information. However, for the Belle II experiment, we will have 50–60 times more data. This metadata service may have problems with performance, scalability, and durability when employed at Belle II. These issues are compounded when metadata searches are extended to the event-level. Accordingly, we have designed a new metadata scheme for Belle II which solves these problems. This paper describes the new metadata scheme which provides high performance, scalability, and durability when employed at Belle II. These issues are compounded when metadata searches are extended to the event-level. Accordingly, we have designed a new metadata scheme for Belle II which solves these problems. This paper describes the new metadata scheme which provides high performance, scalability, and durability when employed at Belle II.

Leading Belle II Data Handling Working Group which consists of more than 30 persons from 12 countries

Development of Geant4 for Medical and Accelerator physics

- ✦ **Title: Development of Geant4 for medical physics and High Energy physics**
- ✦ **PI: Kihyeon Cho and Soonwook Hwang**
- ✦ **Sponsor: Creative project by KISTI**
- ✦ **Budget: around half million dollar**
- ✦ **Period: Jan. 1, 2012~ Dec. 31, 2012**
 - ❖ Maybe renew
- ✦ **Goal:**
 - ❖ Geant4 multi-processing R&D
 - ❖ Porting on Suprecomputing
 - ❖ Profiling and Large-scale test, evaluation and improvement
 - ❖ Simulation for HEP and Medical physics using Geant4
 - ❖ Etc.

Name	e.mail	Major (Ph.D.)	Role
Kihyeon Cho	cho@kisti.re.kr	HEP experiment	HEP Application
Soonwook Hwang	hwang@kisti.re.kr	Grid IT	Medical Application
Youngjin Kim	yjkim@kisti.re.kr	HEP experiment	HEP Application
Soo-hyeon Nam	shnam@kisti.re.kr	Phenomenology	HEP Application
Taegil Bae	esrevinu@kisti.re.kr	LQT	Geant4 porting (ParGeant4)
Sangsu Ryu	sangsuryu@kisti.re.kr	HEP experiment	Geant4 porting (Geant4-MT)

Geant4 R&D

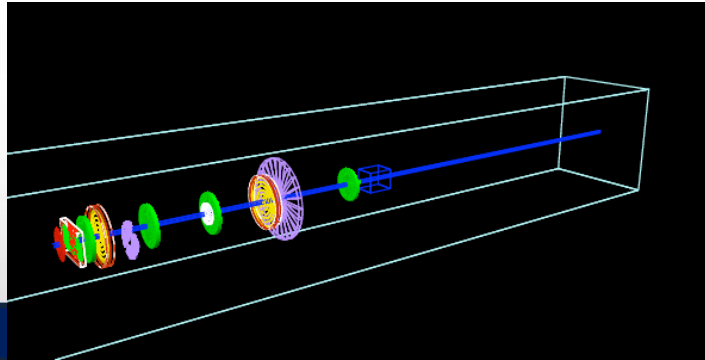

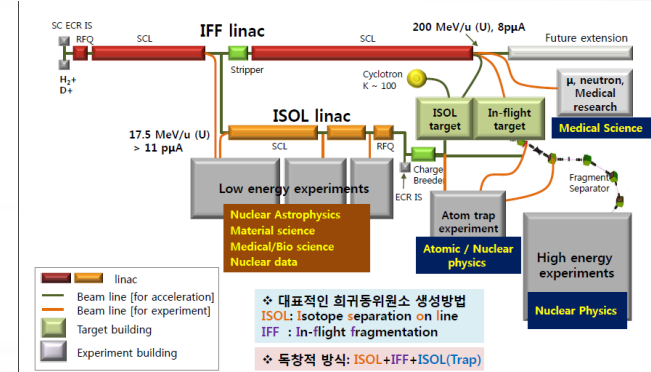

- ❖ Supercomputing porting
- ❖ Geant4 parallel processing
- ❖ Geant4 optimization R & D

Geant4 applications for HEP

- ❖ KoRIA (Korea Rare Isotope Accelerator) and astro-nuclear physics
- ❖ Detector R&D

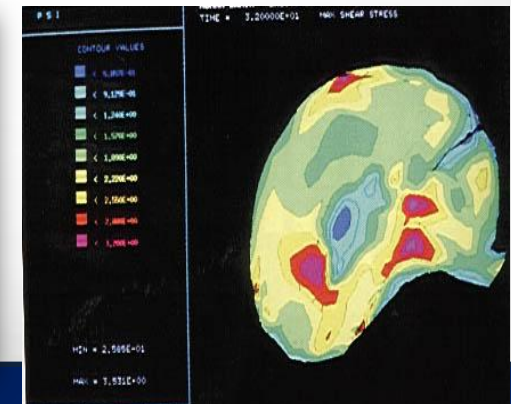

Geant4 applications for Medical Physics

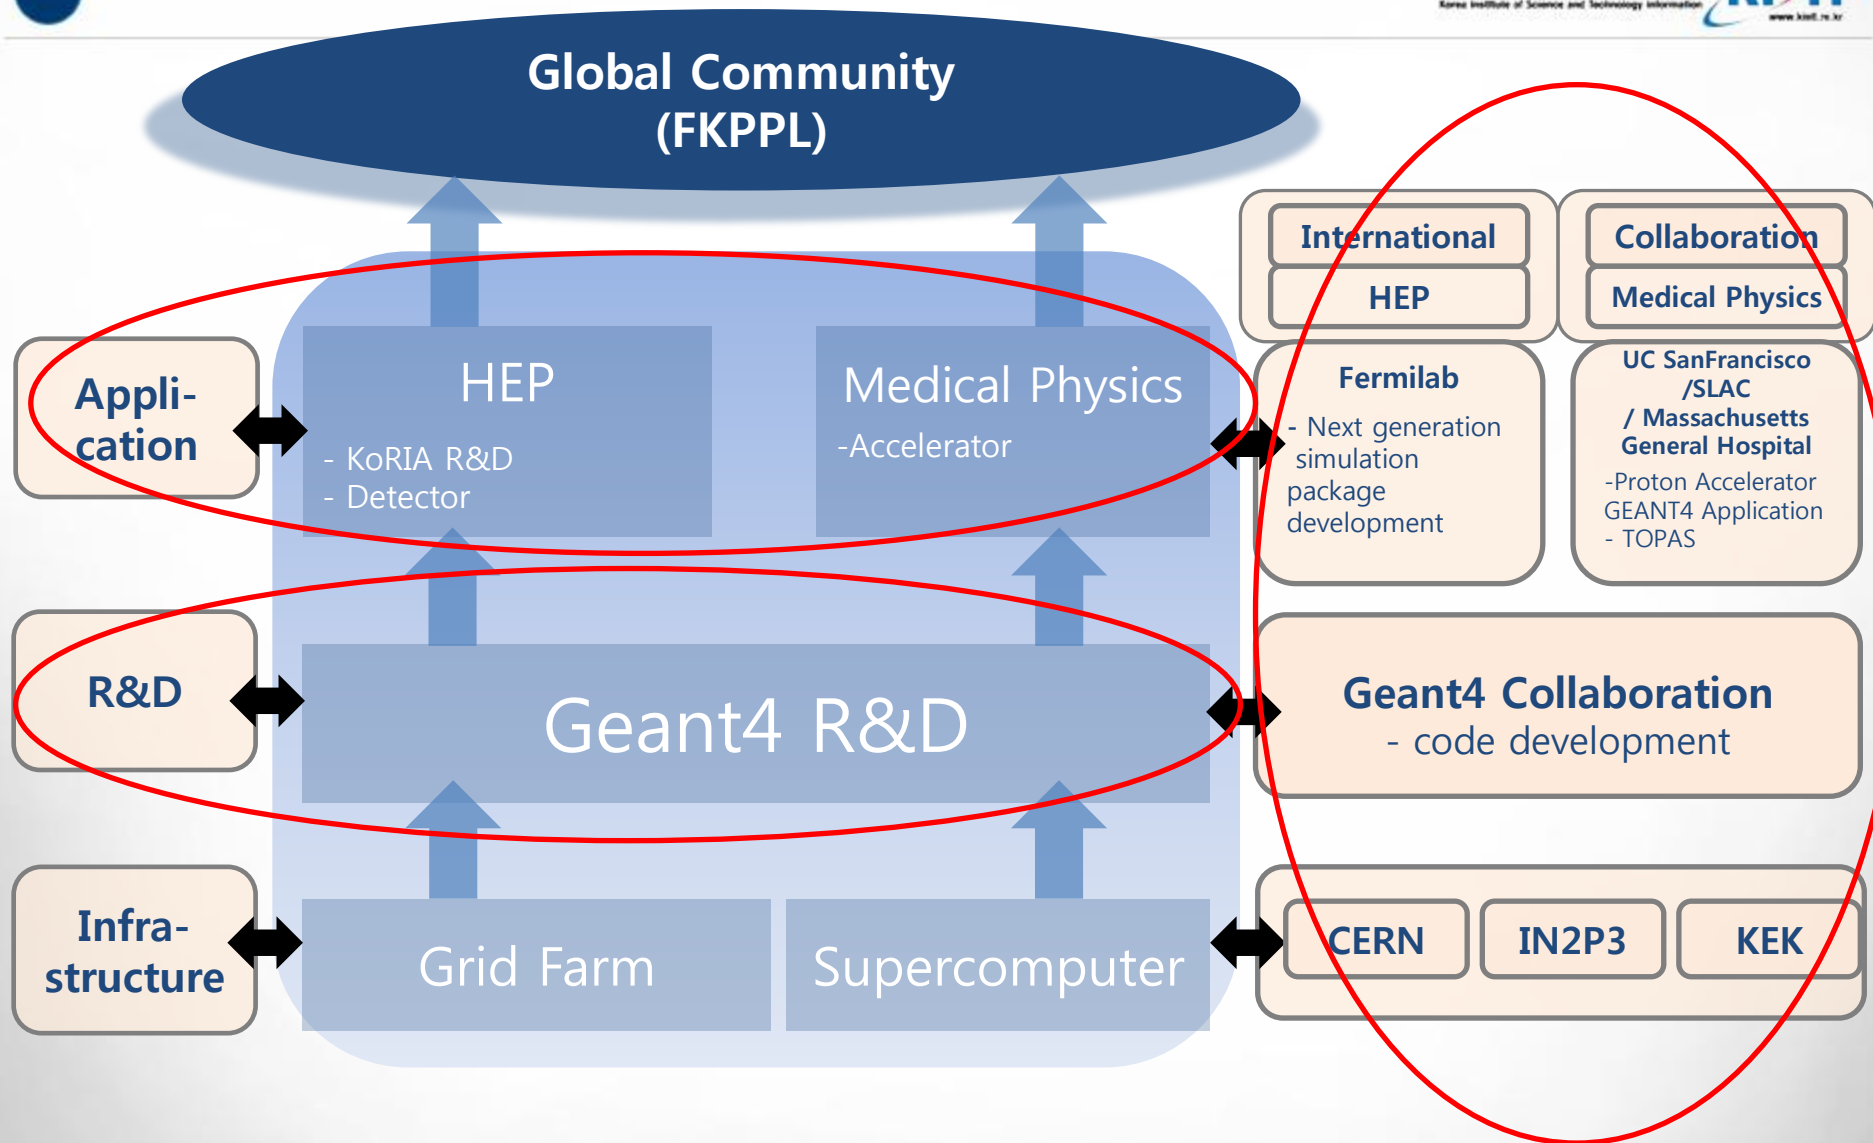

- ❖ Geant4 application for proton accelerator
- ❖ Medical physics using Geant4
- ❖ Geant4 community building

High Energy Physics vs. Medical Physics

	High Energy Physics	Medical Physics
Input data	N/A	50MB (ex, CT data)
Farm	Grid Farm/ Supercomputer	Supercomputer
Porting	Grid Farm	Supercomputer
Application Package	HEP Application	TOPAS, GATE
Community	HEP Application (Belle II, KoRIA)	Accelerator Center
International Collaboration	Fermilab, USA	UCSF/SLAC/MGH, USA
Contents of international Collaboration	Detector simulation package using Multi-thread/parallel computing	Proton Accelerator using Geant4 application

✦ Geant4 R&D

❖ Supercomputing Porting

- SUN Cluster: Tachyon (Sangsu Ryu) => Geant4-MT
- SUN Cluster: Tachyon (Taegil Bae) => ST(Geant4),
MPI(ParGeant4)
- 1. Single-thread performance measurement and analysis
- 2. Studies of vectorization or parallelism of Geant4

❖ Parallel Computing Using multi processing (core)

→ Fermilab

- Understanding and Improvement of Single thread
- Geant4 profiling protocol
- Studies of vectorization or parallelism of Geant4

Contents	KISTI (SUN Cluster) -Sangsu Ryu	KISTI(SUN Cluster - Taegil Bae	Fermilab Group (Stand-alone cluster)	UCSF Group (Medical)
Geant4 single-thread porting	User support Mandatory	User support Mandatory	Mandatory	TOPAS porting (KISTI) and supporting Korean group
Single-thread performance measurement	Needed	Needed	Needed	Needed
Parallel processing porting	Geant4-MT	Geant4-ST ParGeant4	Needed	Medical physics application using Geant4-MT and Par Geant4
Studies of vectorization or parallelism of Geant4	If possible	If possible	Needed

January

- ❖ Kick-off meeting

Jan.~Feb.

- ❖ Porting on supercomputing

Feb.~Sep. International Collaboration

- ❖ Fermilab
- ❖ UCSF

March

- ❖ Geant4 Workshop

October

- ❖ Geant4 Tutorial

2010 Summer Training Course on GEANT4, GATE and Grid Computing

기간 : 2010년 7월 7일 ~ 7월 10일 주관 : 한국과학기술정보연구원, 국립암센터 후원 : 기초기술연구회, CNRS/IN2P3(프)

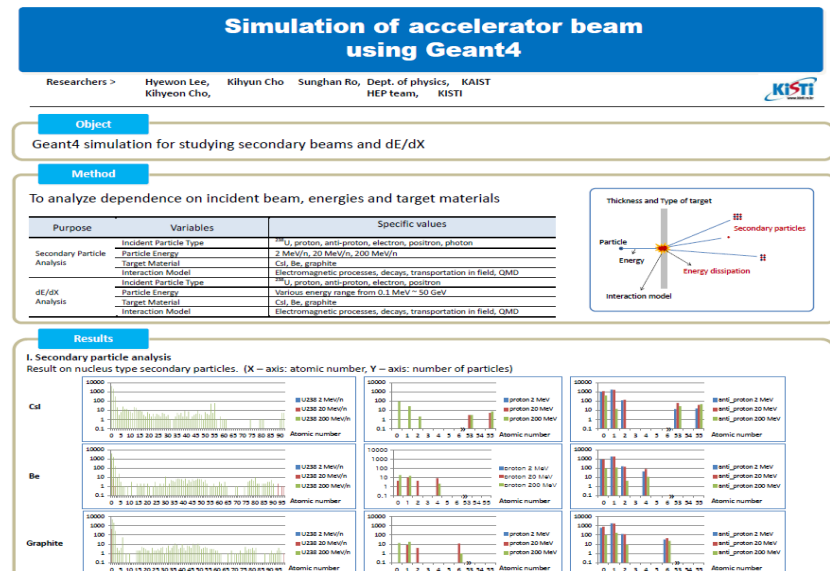

2011 GEANT4/GATE/Grid Tutorial for Medical Applications

기간 : 2011년 10월 31일 ~ 11월 4일 장소 : KISTI 서울본원 주관 : 한국과학기술정보연구원, 국립암센터 후원 : 기초기술연구회

✦ To join Geant4 Collaboration

✦ Output Quantity

- ❖ SCl paper – 2
- ❖ International Conference – 1
- ❖ Domestic Conferences – 2
- ❖ Report Document – 1
- ❖ Organizing Conference – 2

	KISTI	Fermilab
Application	KoRIA and Detector R&D	Next generation detector simulation package
R&D	Geant4 R&D	Geant4 Multi-thread or parallel computing optimization
Infrastructure	Supercomputing porting	Performance profiling (Stand-alone cluster)

○ Budget for Fermilab Collaboration: 45million won (~40,000\$)

- Period: Feb. 1 ~ Sep. 30, 2012
- Item: Stand-alone cluster, travel and so on

○ Need a proposal from Fermilab and contract

- Maybe need matching funding such as labor fee
- To send template form and example files

✦ Discussion item

- ❖ physics/computing program that we/you support
- ❖ interest in simulation R&D and high performance computing
- ❖ mission statement and goals in simulation
- ❖ Anything else?

✦ Contact person

- ❖ Fermilab – Soon Jun (?)
- ❖ KISTI – Kihyeon Cho

✦ Next Meeting?

✦ Your suggestions are welcome!

Thanks

KISTI
