

Kurt's diagram

Proposal for v2.10.0 goal, 07-Dec-2021 07:00

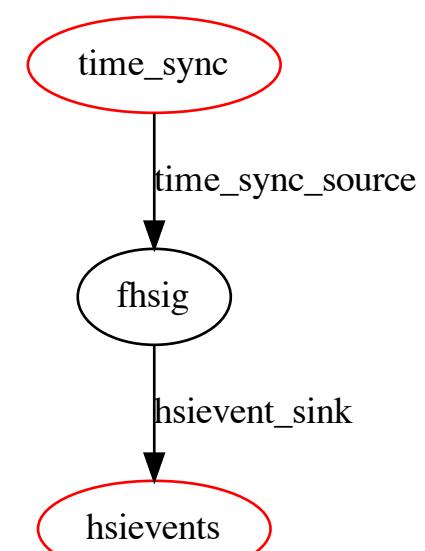

- A two-Readout-App system is shown
- All of this includes the use of the NetworkManager
- Known issues with this version of this diagram:
 - Nothing is included here about "data recording" or ErrorFrameConsumer (in the Readout App)
 - Nothing is included here about the Trigger Primitive stream from Readout to Dataflow
 - This is all pre-DFO

- Queues are shown as solid lines; network connections as dotted lines
- Trigger Decisions and DataRequests are shown with orange lines
- Emulated WIB Frames, Data Fragments and TriggerRecords are shown with blue lines
- Trigger-related messages and data structures are shown with green lines
- Trigger Primitives are shown with red lines
- TimeSync messages are shown with purple lines

TriggerApp
(With an error on the source of TPs)
