

Atmospheric Neutrinos for Non-Specialists

Saturday, 30 July 2022 09:30 (45 minutes)

The aim of this talk is to set the stage for the neutrino tomography workshop and to provide basic information about the properties of atmospheric neutrinos. I will present a pedagogical overview on atmospheric neutrinos, their history, and briefly review their current use in the study of neutrino oscillation.

Attendance type

Virtual presentation

Primary author: KEARNS, Edward (Boston University)

Presenter: KEARNS, Edward (Boston University)

Session Classification: Workshop

Track Classification: Multi-messenger Tomography of Earth (MMTE 2022)
