

Vamos a Fermilab

Engaging Hispanic & Latinx STEM Talent

Spend three days at a national lab!

- Tour the experiments
- Learn about STEM job and internship opportunities and how to apply
- Shadow Fermilab STEM professionals as they perform their daily activities
- Attend lectures on science and technology

Topics

- Electrical and mechanical engineering
- Computer science
- Applied mathematics and chemistry
- Particle physics and cosmology

Fermilab is located in Batavia, Illinois, about 40 miles west of Chicago. The laboratory employs more than one thousand scientists, engineers and technicians and collaborates with scientists from around the world. Learn more about Fermilab at www.fnal.gov/pub/science
