Future plan -Gas and recoil experiments at M01-

Target material: Cr, Fe, Ni, Cu, Nb, Mo, Au, SUS and so on @M01

→Aerosol-sampling by impactor in each metal sample

Future plan -Gas and recoil experiments at M01-

Target material: Cr, Fe, Ni, Cu, Nb, Mo, Au, SUS and so on @M01

→ **Aerosol-sampling by impactor in each metal sample**

To evaluate the amount of radionuclides with aerosols,
amount of “recoil” products from each metal is required.

→ **Measurements of “recoil” products using each metal and Mylar[®] sheet.**
