FNAL Websites

- Often rely on FNAL list of experiment spokespeople and contacts for our various activities

  - We mentioned this at the previous UEC/directorate meeting

  - This list is still out of date

- Make more prominent some relevant HR links

  - We were told that there would be new links:

    - Under the researchers category ✓

      - Link is restricted and/or broken ✗

      - Should go to a Office of General Counsel page

    - No link to policies.fnal.gov under researchers category ✗

    - No links added to the "Resources for" box either ✗

  - The UEC Homepage was updated as well ✓

    - Uses same forbidden link ✗

  - So there is still work to be done

🔷 Fermilab

Experiment-based EDI Activities

- Next quarterly gathering of the lab-affiliated, collaboration-run EDI groups on Monday, April 18, 2022.

- New mailing list created for that (UECEDISTAKEHOLDER@FNAL.GOV)

- Each experiment will be sending in one slide covering

  - How each collaboration is approaching EDI

  - What specific EDI efforts are being undertaken

  - What, if anything, are the EDI pinch-points

🟰 Fermilab

Upcoming Meeting Planning

- **Fermilab Users Meeting**

  - Worked with Sophie on securing an EDI speaker

- **New Perspectives**

  - I'm being told that this will span the Thursday/Friday afternoon of the UM week (hybrid) and the following Monday/Tuesday (virtual)

  - FSPA is discussing a career panel

    - Discussed how to make this new/different from other career panels

  - FSPA also discussing an EDI panel

    - There are several of EDI activities during the UM (plenary speaker, LRG panel, etc.)

    - FSPA will re-evaluate this when more clarity on the existing plans/schedules for NP and UM

- **Pride Month (June)**

  - Discussed with Olivia what sorts of activities could be done in recognition

  - Should coordinate with <u>Spectrum</u>

🎇 Fermilab

UEC Education and Public Engagement, summary

- Work ongoing to get **concerns reporting/policy links** in more prominent places

- Push to update **outdated FNAL webpages**

- Planning for the next **EDI stakeholders meeting**

- Planning ongoing for the upcoming **Users Meeting and New Perspectives**

Fermilab

Volunteering opportunities mailing list

- Mailing list created!

  - outreach-mentoring@fnal.gov

- Best way to make this list popular and useful:

  - Making sure we stay on top of the opportunities and send a useful digest

  - Highlight the significant contributions and accomplishments from people who have assisted with or participated in recently completed programs.

- Working on preparing promotion/sign-up campaign

  - Catherine has been working on an email to all users/employees and a Fermilab News article

  - Will work with Fermilab EPE and EDI to make sure this works with them

  - We will need your help to promote this list to your respective communities

- Will be useful for advertising mentorship opportunities like the ACT-SO program
