

Steering Committee 2nd Meeting

10:00 – 11:30 pm (Chicago time)

Monday, April 9, 2012

Agenda

1. Mechanism to address Bill Brinkman's request on independent development of the Homestake Mine for dark matter. His exact statement is "Options that allow us to independently develop the Homestake Mine as a future facility for dark matter experiments should be included in your considerations". Pier will communicate with Bill (possibly today) to make sure that we understand his intention.

2. Forming subgroups: I would like to divide ourselves (both Steering committee members and ex-officio members) into three subgroups. They are
 - a. Group to help the April 25-26 Workshop
 - b. Writing Group
 - c. Group to help answering Item #1 above

I would greatly appreciate it if you could let me know which group you would like to join before our meeting tomorrow.
