

Quarterly all-scientist meeting

- The SAC usually communicates to the rest of the scientists at the Lab via quarterly all-scientist's meetings.
- The two retreat summary meetings in December and the IPPM strategy meetings in January and April filled the role of these meetings for the first half of 2022.
- It is time for our next quarterly meeting with all the scientists at the Lab.
- Proposed date:
 - Friday, July 8th
 - 2:00-> 3:30pm
- Proposed agenda:
 - Snowmass and the pivot to P5

Quarterly all-scientist meeting

- The aim is to

1. Inform the scientist community of how the Lab has positioned itself for Snowmass and P5
2. Provide the Snowmass Workshop participants a unified understanding going into Seattle

The PIP-II and LBNF/DUNE are the flagship projects of Fermilab and we should all be able to speak questions frequently asked. While the Snowmass process is ongoing, we have a reasonable view of Fermilab's interests. Thus two newly created working groups are beginning to design Fermilab's input to the P5 process. As Fermilab is the premier high energy physics laboratory in the US, this input will be influential. Up next is the 10-day Seattle Snowmass Summer Study, which will identify and document the community's vision for the future of particle physics in the U.S. Fermilab will have a large presence there.

- Agenda:

- Gina Rameika A Dune primer and FAQ
- Brenna Flaughner / Steve Brice The Booster Central Design Working Group
- Jim Amundson The Scientific Priorities Working Group preparations for P5
- Joel Butler The Snowmass process in Seattle
- ? Wrap up / summary / directorate view ???

- Discussion?
